**THE PRES LAV VOCABULARY IN THE TRANSLATION OF THE APOCALYPSE OF
PSEUDO-METHODIUS**

(Summary)

In the article are discussed the lexical particularities of the Old Bulgarian translation of the Apocalypse of Pseudo-Methodius which connect it with the texts originating from the Preslav literary centre. On the basis of comparative lexicographic study with a high degree of probability is drawn the conclusion that to the typical Preslav lexemes could be added such words as: жоупись / жоупельнь / жоупельчь, брѣжда / брѣжда, дѣчнна, зѣлокъзньно дѣло and зѣлокъзньнъ, мѣннѣн, юнота – παρθήνος, поповъenne – ἀποστασία, лнвзлн оєлз – ὄναγρος.
