LINGUISTIC PECULIARITIES OF THE SERMON ON JOSEPH'S STRENGTH

*(Summary)*

The text of Слово о крѣпости иосифовъ is analysed according to a copy in Cod. Berol. Wuk. 48 of the early 14th century arguing its early South-Slavonic origin. On the basis of lexical, morphological and syntactical peculiarities it is assumed that the translation of the Sermon can be linked to the output of the Preslav literary school.
